TECHNICAL DESCRIPTION

Pure monoethylene glycol-based antifreeze liquid specifically designed for cooling circuits of thermal engines requiring HOAT (Hybrid Organic Acid Technology) fluids. The use of this very versatile product, suitable for cooling both the latest generation of aluminium alloy engines and older engines with ferrous and cast iron parts, protects the entire circuit from overheating, corrosion and fouling. Thanks to Si-POAT technology, i.e. the combined action of silicates and phosphates and their synergetic action, maximum product stability is ensured, prolonging its effectiveness and service life.

BENEFIT

- Si-POAT technology (combined action of silicates, phosphates and organic acids);
- Maximum protection of cast iron, iron and aluminium alloy motor circuits;
- High thermal dissipation capacity;
- Tracer presence to quickly detect any leaks in the circuit;
- Excellent protection of the circuit and all rubber parts;
- Maximum ebullient rise;
- Extended service life.

TECHNICAL DATA SHEET

PURE ANTIFREEZE HOAT

Typical characteristics

Properties	Unit	Method	Average values
Colour	-	ASTMD3306	blue
Appearance	-	ASTMD3306	limpid
Density	Kg/dm ³	ASTMD3306	1,12
Ph	-	ASTMD3306	8,5
Boiling time	°C	ASTMD1120	197
Freezing point	°C	ASTMD1177	-38
Glass corrosion testing	mg/provino	ASTMD1384	pass

% Weight ethylene glycol	Freezing time °C
4	-1,3
10	-3,5
16	-6,3
20	-8
26	-12,2
30	-15,1
36	-20,1
40	-24,1
46	-31,2
50	-36,4

MODE OF USE

Use in accordance with the recommendations in the user and maintenance manual supplied by the manufacturer. Store in a cool, dry place, protected from direct sunlight and at temperatures not exceeding 60°C (140°F).

SAFETY AND ENVIRONMENT

Use in accordance with the recommendations provided in the Safety Data Sheet. Additional information on MSDS.
